

Olisaemeka Paul Ani

Vancouver, BC | opa8@sfu.ca | linkedin.com/in/olisaemeka-paul-ani | github.com/Olisaemeka-Paul-Ani

EDUCATION

Simon Fraser University

Burnaby, BC

B.Sc. Data Science (Computing), Minor in Computer Science

Expected: Dec 2029

- Relevant coursework: Differential and Integral Calculus, Linear Algebra, Logic and Proof Techniques, Combinatorics and Graph Theory, Object-Oriented Programming with Elementary Data Structures
- Member: ColorStack SFU, Computing and Data Science Student Society, Competitive Programming Club, Run Club, Students of Caribbean and African Descent (SOCA)

EXPERIENCE

Software Engineer

April 2026 – Present

ColorStack SFU

Burnaby, BC

- Developed and deployed a Python Slack bot (Slack Bolt, Socket Mode) on **AWS EC2 (systemd-managed)** with a **Supabase/PostgreSQL** backend, currently serving **60 active members**
- Built a job-scraping pipeline (Canadian Tech Internships GitHub repo + Bluedoor API) with **Supabase-based deduplication**, posting new listings 4x daily; surfaced **1,000+ postings** to date
- Created a scheduled automation system that posts daily algorithmic programming challenges via a **GraphQL API** and motivational content on a recurring schedule, plus a **/leetcode leaderboard** slash command backed by Supabase for club members
- Currently designing and building the ColorStack SFU club website (**React, Vite, Tailwind CSS, Framer Motion**) to support the Fall 2026 recruitment cycle

PROJECTS

LeetGrind | *React Native, Expo, TypeScript, Supabase, Zustand, React Query, RevenueCat*

May 2026 – Present

- Building a full-stack **React Native/Expo** iOS mobile app with a **Supabase backend**, using **Zustand and React Query** for state management
- Implemented **Google and GitHub OAuth** sign-up/sign-in via **Supabase Auth**, and built a **custom contribution/streak heatmap** component without third-party charting libraries
- Designed and built the complete UI across **four core screens** (home, stats, settings, groups); integrated **live Supabase data** and built custom data visualizations and charts using **RevenueCat** for payroll and entitlement gating

Student Learning Analytics API | *FastAPI, Pydantic, pytest*

2026

- Built a REST API with multiple endpoints for an **AI tutoring platform** that logs **student interactions** and surfaces **per-student confusion analytics**
- Engineered a per-student analytics engine that aggregates **confusion scores by topic** and computes **learning trends** across interaction history
- Achieved full edge-case test coverage using **pytest** and **TestClient** with zero linting errors enforced by **ruff**

Booking Application | *Go, net/http, HTML Templates*

2026

- Built a **REST-based reservation management application in Go**, implementing routing, middleware, **session-based authentication**, and server-side rendering with a structured handler/model/repository layout

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, Go, SQL, C++, HTML5, CSS3, Bash, PowerShell

Frameworks & Libraries: React Native, Expo, React, Vite, Tailwind CSS, Framer Motion, FastAPI, Pydantic, pytest, ruff, Pygame

Tools & Infrastructure: AWS EC2, Supabase, PostgreSQL, AppWrite, Git, GitHub, Claude API (Anthropic)

Certifications: Introduction to Cybersecurity (Cisco Networking Academy), Cloud Platform Job Simulation (Forage), Python (Basic) (HackerRank)

LEADERSHIP AND EXTRACURRICULARS

Peer Educator

Sept 2025 – May 2026

Fraser International College

Burnaby, BC

- Tutored students in **Calculus II, Discrete Mathematics, and introductory Python**, breaking down abstract concepts into concrete problem-solving approaches

AWS AI/ML Scholarship | *Udacity Nanodegree (Phase 1)*

March 2026 – Present

- Selected for the AWS AI/ML Scholarship from a ~100,000-applicant challenge phase; completing coursework in machine learning fundamentals, including supervised learning, neural networks, and model evaluation
